I have more than 17 years of experience, 12 of them as a member of the board of directors. My knowledge ranges from the execution of operating and strategic consultancy, to the management of large professional services teams. My goal is develop my role as IT manager, CIO or business unit manager in a company that is facing great challenges to change, grow or internationalize.

I'm Telecommunications Engineer Master Degree, specialized in electronics. My working experience began in the Information Technology consultancy area. In this environment I developed a wide range of tasks, from programming and analysis of mission critical systems to professional services' area management, with more than 70 consultants in charge between Barcelona and Madrid. At this stage I created the area of project development and mission-critical eBusiness Solutions, I've developed the Offering of products and services, I've worked in the marcom plan and I've been in charge of its forecast and profit.

In my second stage, whose's still in progress, I've studied an executive MBA in EADA and I've begun to work as a CIO in Salvador Escoda, S.A, a mid range, family owned company. During this time I've combined my technical expertise with business education in order to set up an ERP (Oracle eBusiness Suite), reorganize internal processes and remodel the company management system introducing tools as the budget, the indicators of performance, the balanced score cards and management techniques based upon projects. In this stage I've been collaborating as associate professor in IT area and tutor of eMBA projects in EADA.

I offer change orientation, team work and passion for challenges. I look for change that implies improvement and needs creativity and I'm totally results oriented.

Privately I'm passionate about asiatic world, I'm currently studying japanese, and I also love travel and photography.
